

Managed Services Capabilities

AEM provides excellent customer service with an emphasis on quality support.

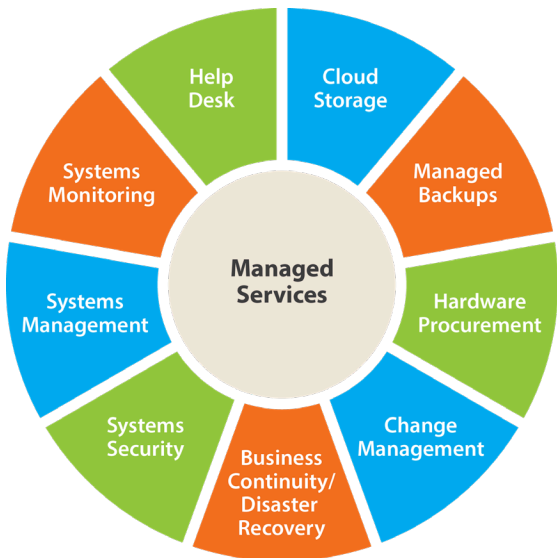

OVERVIEW

Together, AEM and our partners provide clients around the world with industry-leading solutions and services that address business needs. These partnerships help give us the knowledge and power to develop solutions that exceed expectations. Information Systems empower organizations to streamline processes and make sound business decisions.

AEM'S MANAGED SERVICES CAPABILITIES AND KNOWLEDGE

With in-depth knowledge of cloud computing, agile development, and cybersecurity best practices AEM's Managed Services operations ensure an organization's infrastructure and end-user systems are equipped to meet its business needs. Contact us to get more information on how our virtual IT department can help you increase productivity and decrease costs. We provide services to operate your network with no interruptions, receive continuous upgrades and updates. We also provide 24x7 technical support from our experienced and knowledgeable service desk engineers.

The AEM Managed Services approach consists of using the right technology for the job with specializations in many DevOps technologies.
