

VIZURI

BUSINESS RULES AND PROCESS MANAGEMENT CONSULTING

TAP INTO THE HIDDEN POWER OF YOUR BUSINESS RULES

IMPROVE VISIBILITY INTO BUSINESS RULES

Make it easier for everyone to understand and collaborate on your business decisions by using well-defined vocabulary and declarative interpretation to separate business decisions from application source code.

INCREASE THE AGILITY OF YOUR BUSINESS

Better adapt to quickly changing business requirements by decoupling critical business logic from application code so you can view, manage, and change business rules faster and more efficiently.

ACCELERATE YOUR TIME TO MARKET

Reduce reliance on IT staff and shorten development cycles by enabling your business experts to define and manage the decision logic in a separate business rules management system.

BUSINESS PROBLEM

When an organization's business knowledge is not formally defined, it is applied inefficiently and inconsistently. An organization also runs the risk of losing valuable intellectual property when critical business knowledge is buried in code and either inaccessible to key decision makers or limited to personnel who may retire or resign.

SOLUTION

You can address these problems directly with a Business Rules and Process Management System. By extracting critical business decisions from your application source code, you can ensure they're consistently followed by all levels of your organization. You can also reduce "tribal knowledge" by collecting vital business information in a centrally managed location.

HOW CAN VIZURI HELP?

We can help you keep your business decisions and the organization's policies, procedures, and guidelines independent of procedural programming languages and database storage.

Vizuri began in 2002 as the innovation hub of AEM Corporation, an established federal systems integrator and one of America's fastest-growing companies. As technologies and standards have evolved, Vizuri has invested heavily in diverse capabilities to benefit AEM's diverse private- and public-sector clients.

Service Offerings

ADVANCE YOUR DIGITAL BUSINESS TRANSFORMATION INITIATIVES.

LEVERAGE WORLDCLASS EXPERIENCE ADDRESSING SIMILAR CHALLENGES.

We hold extensive knowledge of both the Red Hat products (BRMS, BPM Suite) and the underlying open source projects (Drools, jBPM).

Our team has created and delivered rules development training material that covers how to effectively plan and build applications that use a BRMS.

We have refined our processes, increased our efficiency, and have developed standard practices for engaging with customers.
