

Use Evidence to Choose the Right Education Interventions

Our team of What Works Clearinghouse-certified reviewers works with states, districts, and schools to translate evidence into improved education outcomes. We collaborate with the US Department of Education to identify effective practices. Our content experts help implement evidence-based interventions spanning the full early childhood to postsecondary continuum.

If you intend to implement new interventions to improve performance for your organization, we can help you approach available research and identify best options for your unique context.

AEM HELPS STATES & DISTRICTS TO:

- **Determine education interventions** that could be a fit for specific needs and meet the evidence requirements under the Every Student Succeeds Act.
- **Craft strategic plans** to move from vision to implementation and continuous improvement.
